

### GoSolar Home Program

#### AVAILABILITY

Available throughout the Company’s entire electric service area where the facilities of the Company are of adequate capacity and are adjacent to the premises.

#### APPLICABILITY

To all Standard Residential Customers, who have the legal authority to enter into a contractual agreement for the premise which will be assigned under this tariff. Participation under the GoSolar Home Program is limited, and in the Company’s sole discretion to the amount of solar generation available and subscription will be made on a first come, first served basis.

Customers being served under self-generation riders or tariffs may not purchase power under the GoSolar Home tariff.

#### CHARACTER OF SERVICE

The service shall be single-phase or three-phase, 60 Hertz, and at one standard nominal voltage as mutually agreed and subject to availability at the point of delivery.

#### RATE

A Customer will enter into a contract with the Company for a fixed charge rate for their total net monthly bill before taxes, assessments and other governmental charges. The fixed rate will be \$19.00 per KW based on the equivalent capacity of solar equipment necessary to meet the customer’s most recent 12-month historical usage, based on the current average annual fixed solar photovoltaic production within TEP’s service territory, as determined by TEP. This is a fixed rate per kW for the term of the contract but does not guarantee a monthly bill lower than would otherwise be realized if the customer were serviced under a standard offering tariff.

The Company shall either own and operate, or enter into a Power Purchase Agreement for the energy output of, a solar generating facility (“GoSolar Home Facility”) within the Company’s service territory and interconnected to the Company’s distribution system. The equivalent capacity of solar equipment necessary, as calculated to determine the individual customer’s fixed contract rate, shall be satisfied with the capacity provided by the GoSolar Home Facility. Subscription for each individual customer’s solar capacity needs under this tariff shall be limited to the GoSolar Home Facility’s overall capacity (cumulative customer solar capacity shall not exceed solar facility rating).

The Company shall provide all of the Customer’s electricity requirements at the contractual fixed rate, up to 115% of the Customer’s contractually established historical annual usage. If in any calendar year a Customer’s usage exceeds 115% of the Customer’s contractually established historical usage, the Customer’s fixed energy rate shall be recalculated based on the new annual consumption data for the most recent year.
